

NANUM **LITE** · BILLING ONLY

Keep your care system. Lose the billing headache.

Nanum Lite takes your clients, visits, rates and payers from the care system you already use — and turns them into correct invoices for every payer.

HOW IT WORKS

Three steps. No re-typing.

1

Connect or import

Connect your care system by API, or import delivered visits. Clients, rates and payers set up for you.

2

Complex billing, done

Private, council and NHS rules — capped amounts, contributions and care-home fees included.

3

Push to your accounts

Invoices and credit notes for every payer, straight into your accounting system.

Works alongside the care system you already use — nothing to replace.

3
MONTHS
FREE

Sign up at our stand today and your first three months of Nanum Lite are on us.

📍 Stand M60 · Care Show Birmingham 2026

Nanum **LITE** Billing that gets it right.

FROM YOUR CARE SYSTEM

-  Connect by API, or import delivered visits
-  Clients, rates and payers set up from your data
-  One preview, one confirm — nothing guessed
-  Re-imports never double-count a visit

INVOICES & CORRECTIONS

-  A period's invoices raised in one press
-  Changes after invoicing: credit or extra invoice, per payer
-  Anything that can't be priced is shown, not guessed

COMPLEX BILLING, HANDLED

-  Private, council and NHS — each by its own rules
-  Capped amounts and client contributions
-  Hourly, per-visit, full-day and live-in rates
-  Care homes: per resident, per period, with FNC and CHC

YOUR ACCOUNTS

-  Invoices and credit notes to your accounting system
-  Your account codes, per funder
-  Every change recorded, with who and when

WHY PROVIDERS CHOOSE NANUM LITE

Your care system stays. Your billing gets easy.

1

No re-typing

Your care system stays the source — Nanum Lite reads it.

2

Right payer, right rate

Council, NHS and private — each billed its share.

3

Books always match

Invoices and credits land in your accounting package.

WANT THE WHOLE PLATFORM?

Nanum runs domiciliary care and care homes end to end — rota, app, medication and billing.
